

Obtain the right to download the software

If your Global Account hasn't been set up to download the software, verify if someone in your organization has. If so, you can use their login and password instead. If this isn't the case, you will have to obtain permission yourself by following the next two steps.

A Token is a number of 12 digits (p.e. ABCDEFGHIJKL). It will provide you download rights for the esri software purchased by your organization. Request your token by following this link: <http://www.esribelux.com/application/controllers/productsController.php?category=displayProduct&idProduct=67>. esri Belux will send you the token with the activation codes for your licenses.

When you've received the token, log in on <http://service.esri.com/validate> with your Global Account and validate your token.

Activate Your Permissions

To activate your license management permissions on the Customer Service site, or to gain organization access to the Esri Customer Care portal, we need to link your Global Account to your Esri customer number. Please use the token supplied to you by Esri Customer Service and click *Link My Account*. You will only need to perform this action once. After clicking *Link My Account*, you will see a confirmation screen with the customer number(s) you have access to.

① The token is not your customer number; it is a 12-character string and is likely already filled in for you. If it is not automatically filled in, you can find your token in the correspondence you received.

Enter Token
